With college entrance coming over the horizon and the real world just beyond, a junior puts forth new effort to prove his academic foundations. Character is revealed in work that is well done.

Language exercises designed to familiarize the student with college-level writing are provided. Composition is stressed to develop technique. Vocabulary expansion is accomplished with over 500 important words, 200 prefixes, roots and suffixes. Unabridged classic literature with study guides further the student's reading and critical analysis.

The Bible text is a fascinating survey of western church history from post-apostolic to the end of the nineteenth century. (Alternates available including the wonderful *Summary of Christian Doctrine* by Berkhof.) The CHC *History Overlay* adds many valuable insights into the principles of a hearty Reformed world view in a final, high-level American history study. Constitutional government is the focus of this course.

In eleventh grade science, physics is studied from a creationist viewpoint. Saxon *Advanced Math* is a comprehensive treatment of pre-calculus math including topics from algebra, geometry, trigonometry, discrete mathematics and mathematical analysis. Saxon *Algebra 2* is also available. (Math may be selected to match the student's needs.)
