To establish a solid beginning for the new high school student, highly effective and interesting texts spark this grade level and introduce an academic step ahead.

In Bible, Part I begins with the study of one of the most important books ever written . . . Reformer John Calvin's *Institutes*. This sensibly abridged edition is very readable and fitting for today's serious student. Assigned readings are supplemented with practical discussion topics, writing assignments and a comprehensive test set. Answer keys help with penetrating insights. Memory verses are assigned. (Alternate Bible studies are available.)

In language arts, the *English Workshop* program provides instruction in grammar, sentences, phrases and clauses, with a second semester focus on composition. Note-taking and notebook keeping are encouraged because college and the working world expect us to understand and recall what is said. Etymology is continued in order to expand vocabulary. Unabridged classic literature selections with excellent study guides are provided.

History in ninth grade studies *Cultual Geography* of the world and is complete with an activity booklet, teacher's edition and tests.

Freshmen science is a study of biology from a strong creationist perspective. A full test manual is provided. Math studies include Saxon *Algebra 1* or Jacobs *Elementary Algebra*; geometry or algebra 2 are options for the advanced student.
