

Seventh grade is in every respect a time of transition. New, more serious preparations for life and service are encountered. The excellent Write Source 2000 program will guide your student through the process of learning to write effectively. Note-taking and outlining are promoted. Lessons in etymology are continued with a new series of word studies in Latin and Greek roots. Unabridged classic literature is consistent with the period of history being studied.

The Bible program, an in-depth Old Testament analysis of the *Kingdom of God*, is provided in survey form with a test set and scripture memorization. Students finish their study of the Old Testament in eighth grade, or have the option of working in the *Westminster Shorter Catechism*, an excellent choice for older siblings as well. The history text and the CHC *History Overlay* cover the period of the Middle Ages to the present.

Exploring Creation with General Science is designed to be a student's first systematic introduction to the sciences. A transitional math text presents a complete review of all mathematics up to algebra. Saxon Math is also available at any level needed.
