To avoid possible academic doldrums of the sophomore year, Covenant Home encourages a true sense of excellence by offering grammar review and further advances in vocabulary. At this level students are expected to write and speak intelligently and interestingly. Thus, our etymology and composition studies continue in language arts. SAT- type analogies are provided to prepare the student for college entrance tests. Two unabridged works of classical literature with study guides are provided.

In Bible, Part II continues with the study of one of the most important books ever written . . . Reformer John Calvin's *Institutes*. This sensibly abridged edition is very readable and fitting for today's serious student. Assigned readings are supplemented with practical discussion topics, writing assignments and a comprehensive test set. Answer keys help with penetrating insights. Memory verses are assigned. (Alternate Bible studies are available.)

Western Civilization presents a compelling survey of the nations that experienced the greatest blessing and guidance from the 14th century to the present, from the reawakening of the Reformation in Europe to the trials and tests of the modern age. The study includes the CHC *History Overlay* which introduces the student to overarching themes and perspectives. Students will write a research paper in conjunction with this study.

The tenth grade science program is chemistry taught from a creationist perspective. Math studied the Covenant Home sophomore year is Saxon *Algebra 2*, which is included in the full curriculum. Families also have the option of using Jacobs *Geometry*. This thorough program gives a classical approach to reasoning, geometric proofs and basic geometry skills.
