It is the final hurrah! Your child is almost finished with high school and will have many stories to tell about all the challenging courses. The twelfth grade language program is concluded with an exciting, insightful and enjoyable look at six of Shakespeare's plays, in which the student learns to recognize and appreciate their many biblical themes.

In Bible, students do an in-depth study of the law of God (as it applies in today's society) and His directive for Christian leadership in the world. (Alternates available including extensive doctrinal, catechetical or historical studies.) The history worktext teaches the principles of civil government according to the Holy Scriptures. Students will write a positional paper in conjunction with this study.

Science follows Apologia's track, with four options available — Human Anatomy, Advanced Chemistry, Advanced Physics, or Marine Biology. (See prerequisites on the next page.)

In math, Saxon *Calculus* treats all of the topics normally covered in an Advanced Placement AB-level calculus program, as well as many of the topics required for a BC-level program. (Math courses may be selected according to the student's need and ability.)
