

# Choosing The Best Ordering Plan: Full Curriculum, Modules or Tailoring???

**W**hat does this all mean? When I order, which do I choose?  
The following is a quick guide that should help:

**F**ull curriculum - If the full curriculum selections will meet your child's needs, this is always the best way to order. The advantages for you are: A complete *Day-by-Day* with all subjects scheduled in one document, a discounted, full curriculum price and the Covenant Home *Preceptor* and *Grading Masters* at no additional charge. Furthermore, replacement kits may be purchased for younger children who will use the curriculum.

**M**odule orders cost a little more but enable you to choose only the subjects you want, or they allow you to choose an alternate subject or one on a different grade level without having to pay a tailoring fee. (If you would like to have a *Preceptor* and/or *Grading Masters*, these items may be individually added to your order.)

**T**ailoring a full curriculum can cost a little more but enables you to still have a full *Day-by-Day* with the majority of your subjects scheduled in one place. It too includes the *Preceptor* and *Grading Masters*. Tailoring works well for families who, for example, want to teach the same Bible or history course to two or more students, or if they find it necessary to change the level of math to meet the specific needs of the student. It also applies to full curriculum orders where an alternate study is selected. *Tailoring fees are \$15 per change.* Since the final amounts will vary when items are removed from the kit and

replaced with new items, it is best to request a call back or an email notice if you would like to know exact figures.

**S**till not sure? Please call or email us. The CHC staff is always eager to help you figure out the most economical way to order, once you've determined what you need.

**W**hat is a replacement kit? A replacement kit contains all the consumable items plus any new items from the previous year's catalog. Buying this kit enables you to use with another child the texts and teacher materials previously purchased, and to save money without sacrificing academic quality. We always include a new *Day-by-Day* in your replacement kit so you can make notes in the one you currently are using. You may add any new item to a kit or tell us to delete an item in order to reduce the cost. Tailoring fees will apply only when adding items from a different grade level. A complete listing of the contents of each replacement kit may be found on the website at [www.covenanthome.com](http://www.covenanthome.com). Lists are updated with the release of each new catalog.

**W**hen should I order a twin kit? Whereas replacement kits contain consumables, twin kits contain readers and texts as well as consumables. You should purchase a twin kit for the **second student** if you have two students in one grade *at the same time*. By doing this, each student will have his own texts, workbooks, readers, tests, etc., but you won't be buying two sets of teacher materials.

## Covenant Home *DIAGNOSTICS*

**T**he Covenant Home diagnostic tests are designed to show you the progress and preparedness for the next grade level for your child and make it easier for you to change curricula without worry.

Whether transferring from public or private school, or another homeschool curriculum, conscientious parents welcome an objective measurement of their children's academic standing. Covenant Home's diagnostic testing series puts aside the fears involved in changing curricula and effectively removes the uncertainty about how your child will do in a new and better curriculum.

Developed by the Covenant Home staff, these tests are patterned, in part, after earlier, more stringent SAT national standards and grade levels. This is to ensure accuracy and objectivity of the testing results. Standards are also based on curriculum levels in Warriner's English Grammar and Composition, (series) published by Harcourt, Inc. in 1959. [Formerly: Harcourt Brace & Co.]

Maintenance of an objective testing program will provide you with some very valuable benefits:

- An objective and confidential evaluation of your children's academic preparedness for the next grade level.
- Convincing and respected evidence for officials of your state who may scrutinize your home teaching and curriculum.
- A standard of comparison enabling you to make curriculum changes with confidence and ease.

The cost of each Covenant Home *Diagnostic* is \$30 per test, postage included within the U.S. For overseas orders, please include \$14 for postage. Evaluation and results are included.

Please visit our website at [www.covenanthome.com](http://www.covenanthome.com) for further information.

Note: The diagnostic tests presented here are separate from the CHC test sets which measure mastery of the subject matter and are included in all our full curriculum and modular programs.

# Price List

<b>PRE-SCHOOL</b>	<b>Price</b>	Saxon 6/5 Math Module	\$98	Apologia Chemistry Module (2 <sup>nd</sup> ed.)	\$105

## Pledge and Coupon

**PLEDGE**

Covenant Home Curriculum is a **gimmick-free company!** We offer an early-bird discount every year, and if your order is over \$800., we give a 50% discount on processing and shipping. We do not bait our families with low initial costs, then require a list of subsequent purchases to fill out a program. Our firm policy is to provide complete and comprehensive programs at the **lowest price that we can.** It is our pledge to you!

## Key Points for Success!

In homeschooling there is no room for failure. When we, as parents, take the reigns of our children's education in hand, success must be a certainty!

### Three things make success a sure thing:

**1)** We must use excellent books and materials that will help us learn and apply a Christ-centered worldview. Such a curriculum must have **balance**, providing every component, every subject in its appropriate measure. Covenant Home provides a *classical approach*, one that beautifully compliments the learning patterns that God has created in the minds of children. We can have confidence to stay with such a comprehensive, established and sensitive methodology.

**2)** We should appreciate the need for **accountability**. The diligence and concentration that goes with the home education enterprise is a wonderful thing to experience, but our focus itself can often mean that we begin to lose perspective. Just as professional athletes

make use of a good coach, we should value experienced oversight. Covenant Home provides families with orderly printed accountability in its very popular Day-by-Day scheduling and an optional backup accountability in its Grade Auditing program.

**3)** The third key to success is **discipline**. The word *discipline* is derived from *disciple*, a title all of us should seek and desire. The common informality of the home should be tempered with a clear line of authority and respect that will be the backbone of our homeschooling venture. Some families use our grade auditing program to help implement and maintain this key.

For more on keys to homeschooling success read CHC articles on our website, [www.covenanthome.com](http://www.covenanthome.com): *A Classical Approach to Education in the Christian Home* and *A Letter from the Administrator*.
